ANNOUNCEMENTS:
All members of the Monroe County Dental Society are members of the Rochester Dental Study Club upon registration. Please make every effort to pre-register. The registration fee is $80.00.

Affiliate membership is available to dentists of the Seventh District Dental Society who do not practice in Monroe County. The fee for registration is $80.00.

Any dentist practicing in Monroe County who does not belong to the County or Seventh District Societies may attend the session upon payment of a non-member participation fee of $100.00.

New/Young members (graduated from dental school in 2015-2017) fee for registration is $50.00

Dental auxiliaries (hygienists and assistants) fee for registration is $45.00.

All fees include parking. On-site registration will require an additional $20.00 fee.

Dental students and resident are welcome as guests of the Study Club.

All need to register to avoid on-site registration fee.

Sign in for CE will take place in the individual lecture room. Please arrive on time!
Dear Friends and Colleagues,

First, let me welcome all of you to the ninety-second annual session of the ROCHESTER DENTAL STUDY CLUB.

It has been my great pleasure to participate in this extraordinary group for the past four years. In 2014, I was asked to join and carry on the work of this prestigious group. I looked at it as a great opportunity to get involved and give back to our ever evolving dental community in Rochester.

We worked very hard this year to put together a program filled with interesting topics which aim to help in your day to day career. The attempt was to get a mix of all aspects of dentistry to be able to cater to the different members of our dental community. Our primary goal is always to present high-quality continuing education to a dental community that always maintains its progressive edge. Our secondary goal is to create three nights for good camaraderie with friends and colleagues to discuss different topics in our field. The challenges that face the future of dentistry are numerous, but the best way for us to move forward will always be together.

I would also like to thank this year’s RDSC sponsors. Thank you for your contribution to the study Club. Please show your appreciation for the sponsors by spending some time visiting their tables during the event.

Lastly, I would like to personally thank and recognize Dr. Marc Malatesta, Dr. Nicholas Schellati, and Dr. Matthew Valerio for all their hard work and dedication to the ROCHESTER DENTAL STUDY CLUB.

So please enjoy these courses, say hello to old friends, and continue to make Rochester a great and progressive dental community.

Thank you,

Dr. Michael Molisani
WANT TO BE INVOLVED IN THE ROCHESTER DENTAL STUDY CLUB???

Please help us make next year even better!

You can help in the following ways:

INTERESTED IN PRESENTING NEXT YEAR???

Please think about an interesting topic that other dentists and hygienists would like to learn about. Please include all the information that is on the preceding pages which includes:

1. Title
2. Summary of presentation
3. Biography of yourself
4. Name of moderator if you would like someone specific introducing you (optional)

Please send the information to: Rochesterstudyclub@yahoo.com

ADVERTISERS

Do you know of a business that could benefit from having their advertisement in front of every dentist in town? Show them this program and have them contact us at: rochesterstudyclub@yahoo.com

Short implants their use in fixed and removable "Conus" restorations

January 9, 2018 - 6:30 pm

Lecturer: Dr. Sean Meitner

This lecture will be part one in a two part series with Dr. James Soltys at 7:45. Dr. Meitner will discuss the fabrication and use of the guide right protocol for in-office fabrication and correction of surgical guides to place short implants in both partially and fully edentulous patients.

Dr. Meitner is a part time faculty in the Department of Periodontology at the Eastman institute for oral health.

He has two private practice with locations, one in Pittsford and one in Geneva NY. Dr Meitner was born and raised in Wisconsin, (Packer Land) a graduate of Marquette dental school and served in the U.S. NAVY prior to coming to Rochester. He is also part owner and doing research and development for DePlaque Inc., on the development and accuracy of "In Office fabrication and Correction of Surgical Guides." (in press)
Success with Pediatric Dentistry: What You & Your Staff Need to Know to Build Your Practice (Part 1)

January 9, 2018 - 6:30 pm

Lecturer: Dr. Doron Kochman

Modern general dental practices are facing challenging economic times. Their successful and active prevention and restorative efforts have resolved much existing dental disease in their dental patient communities. Many practices are now facing difficulties in meeting their daily production goals and are actively searching for new patients with unmet dental needs. Incorporating pediatric patients into your practice, can not only inject more fun and enjoyment into you and your staff’s daily practice routine, but it is also an excellent way to increase your pediatric patient base and thereby gain the attention and confidence of other family members who may not yet be patients in your practice.

We will review the most common issues that clinicians and their staff may experience when interacting with pediatric patients and their families. We will discuss solutions for common behavioral related challenges related to the treatment of pediatric dental patients. Hints will be provided on how to identify and avoid troublesome encounters before they happen.

This course is appropriate for anyone treating pediatric patients including dentists, dental hygienists, dental assistants, dental receptionists and dental office administrators.

Dr. Doron Kochman is a board certified pediatric dentist in full time private practice in Pittsford New York, at Pittsford Pediatric Dentistry, (www.PittsfordPediatricDentistry.com). He is a Fellow of the American Academy of Pediatric Dentistry, and a Diplomate of the American Board of Pediatric Dentistry. He is also a Clinical Assistant Professor in the Department of Pediatric Dentistry at the University of Rochester School of Medicine and Dentistry, and the Eastman Institute for Oral Health in Rochester NY where he teaches pediatric dentistry to both post-graduate pediatric dental residents, and to general practice dental residents. Dr. Kochman is a member of numerous professional organizations and has published articles and lectured nationally on various subjects related to pediatric dentistry.
Obturation: Then, Now, and Future

January 9, 2018 - 6:30 pm

Lecturer: Dr. Alf Bunes

The purpose of obturation phase (biologic filling phase) in the root canal treatment is to prevent reinfection of the root canal system after biomechanical shaping and cleaning. This lecture will review the current concept of obturation materials and techniques and its advantages and limitations. It will try to answer if our current techniques and materials are sufficient enough to provide a favorable outcome. This presentation will also discuss bioceramic material used in endodontics.

Dr. Alf Bunes received his specialty certificate in endodontics from the University of Pennsylvania and was a clinical instructor in microendodontics and microsurgery at the same institution. He has lectured/presented on the following topics including:

- Practiced modern endodontic techniques including apicoectomy, intentional reimplantation, guided tissue/bone regeneration, bone grafting, vital pulp therapy, apexification, apexogenesis, and revascularization
- Used endodontic technology and materials including microscopes (Zeiss, Global), CBCT, tri-antibiotic paste, ultrasonics, MTA, and bioceramics.
- Taught and supervised dental students on the fundamental and practice of endodontics
- Conducted in depth presentations in the topics of Articaine vs Lidocaine, Crown and root treatment, E. Faecalis, Obturation and bioceramics
- Presented research at the annual; AAE meeting in Seattle 2015 on “Incidence of Missed Canals in Previously treated Premolars and Molars evaluated by CBCT”
- Co-authored articles in major journals including Endodontic Topics and the Journal of Endodontics.

Prior to his residency, he practiced as a general dentist in Sandeford, Norway for 15 years and is currently taking his residency (AEGD) at Eastman Dental to fulfill his NYS Licensing requirements.
Short implants their use in fixed and removable "Conus" restorations

January 9, 2018 - 7:45 pm

Lecturer: Dr. James Soltys

This will be part 2 in the lecture series with Dr. Meitner lecture discussing the restoration of short implants.

Dr. Soltys is a 1981 graduate of the Ohio State University College of Dentistry. He subsequently completed a 1-yr GPR at Eastman Dental Center in Rochester, NY. After 10 years of private practice he went back to the Eastman Dental Center to receive his Certificate in Prosthodontics. He has a private practice is Victor, NY. Dr. Soltys is a Board Certified Diplomate of the American Board of Prosthodontics; a member of the American College of Prosthodontists, the American Dental Association, and the Carl O. Boucher Conference. He teaches a one year occlusion course at the Eastman Institute of Oral Health Department of Prosthodontics, and has lectured extensively about implants, ceramics, and partial dentures at the local, national, and international level.
Modern general dental practices are facing challenging economic times. Their successful and active prevention and restorative efforts have resolved much existing dental disease in their dental patient communities. Many practices are now facing difficulties in meeting their daily production goals and are actively searching for new patients with unmet dental needs. Incorporating pediatric patients into your practice, can not only inject more fun and enjoyment into you and your staff’s daily practice routine, but it is also an excellent way to increase your pediatric patient base and thereby gain the attention and confidence of other family members who may not yet be patients in your practice.

We will review the most common issues that clinicians and their staff may experience when interacting with pediatric patients and their families. We will discuss solutions for common behavioral related challenges related to the treatment of pediatric dental patients. Hints will be provided on how to identify and avoid troublesome encounters before they happen.

This course is appropriate for anyone treating pediatric patients including dentists, dental hygienists, dental assistants, dental receptionists and dental office administrators.

Dr. Doron Kochman is a board certified pediatric dentist in full time private practice in Pittsford New York, at Pittsford Pediatric Dentistry, (www. PittsfordPediatricDentistry.com). He is a Fellow of the American Academy of Pediatric Dentistry, and a Diplomate of the American Board of Pediatric Dentistry. He is also a Clinical Assistant Professor in the Department of Pediatric Dentistry at the University of Rochester School of Medicine and Dentistry, and the Eastman Institute for Oral Health in Rochester NY where he teaches pediatric dentistry to both post-graduate pediatric dental residents, and to general practice dental residents. Dr. Kochman is a member of numerous professional organizations and has published articles and lectured nationally on various subjects related to pediatric dentistry.
Digital Dentistry Update

January 16, 2018 - 6:30 pm

Lecturer: Dr. Robert Lang

Digital Dentistry is exploding with new technology and applications. Most of which can be applied to everyday practice. New scanners, 3-d milling units, 3-D printers, materials and software are being developed at a rapid pace. This lecture will be a short overview of everyday applications that can be used in general practice. From same day single unit crowns, crowns fit to partial dentures, and now single visit zirconia (Bruxzir) crowns. Digital impressions for Night Guards, Invisalign and Clear Correct. The ability to digitally and prosthetically plan implant surgeries. Totally digital implant treatment from the cone beam, intra oral image, virtually placing implant, making a surgical guided stent in the office and the final crowns all in the office. Custom healing abutments place the day of surgery allowing final crown placement in properly formed tissue. I

Also discussed will be the newest developments in 3-D printing for the dental office. Including printing models, night guards, surgical stents and models for Invisalign style trays to be fabricated in the office.

Dr. Lang Graduated from SUNY Buffalo in 1983. He has been in private practice for over 34 years in Hamlin, NY. He has completed study at the Dawson Center, Spear Education Center, and the Piper Education and Research Center. He received his fellowship in the ICOI in 1987 and is a past member of the Stonegate Implant Study Group, one of the first five implant study groups in the country. Dr. Lang is a graduate of the Misch Institute both surgical and prosthetic programs. He is certified to do Teeth In A Day. Currently Dr. Lang is a Mentor for Cerec Doctors and helps with the lab portions of their courses. He is also a CEREC trainer and a member of the Spear Study Club. He is a Member of the ADA, AGD, DOCS, AADSM, ICO, Monroe County Dental Society and the 7th District Dental Society.
Improving Endodontic Outcomes  
(Part I)

January 16, 2018 - 6:30 pm

Lecturer: Dr. Harry Singh

This interactive lecture will help clinicians increase their confidence in endodontic therapy. Additionally, it will focus on how to accurately diagnose and treat endodontic cases. Dr. Singh will provide tips to help avoid failures and how to overcome obstacles in treatment. After this course you will be able to properly identify the four main reasons endodontic cases fail in order to better improve your endodontic outcomes.

Dr. Singh is originally from Toronto, Ontario and now resides in Pittsford, NY with his wife and two sons. Dr. Singh is a graduate of Case Western Reserve University. He received his MS in Endodontics from Marquette University. Doctor Singh currently Practices in Rochester NY. Recently, he joined the faculty at University of Buffalo in the Department of Endodontics.
Immediate Implant Placement and Restoration in the Esthetic Zone

January 16, 2018 - 6:30 pm

Lecturer: Dr. Heather Chance

Goals, limitations and timelines will be reviewed for immediate implant, immediate provisionalization of single tooth restorations in the esthetic zone. For the patient, anterior implant cases are typically cases where esthetic demands are rightfully high. The success of immediate implant treatment is dependent on implant design, diameter, and position in relation to the extraction socket, which will be reviewed during the course of this lecture.

Dr. Chance was born and raised in Montreal, Quebec, Canada. She studied at McGill University, earning a Bachelor of Science degree in Molecular Biology and then continued on to attend the McGill University School of Dentistry. She completed residency training in Oral & Maxillofacial Surgery at the University of Rochester. She is now in private practice in Victor, NY at Victor Oral Surgery and Dental Implants and maintains hospital privileges at Rochester General Hospital.
Sleep Disordered Breathing in Children, its’ Far Reaching Health Effects and Why Dentistry has to be Involved.

January 16, 2018 - 7:45 pm

Lecturer: Dr. Anthony Palombaro

This lecture will challenge the way you look at children and your role as a health care provider. Dentistry has always focused on teeth first and not airway but we will talk about how this is beginning to and should change. This lecture will discuss the relationship between pediatric sleep disordered breathing, snoring, restless sleep and many childhood maladies and behaviors such as ADD/ADHD, social aggression, difficulty in school and social situations, bed wetting, ear infections, short attention span, chronic allergies and many more. We will look at the genesis of this problem, the state of the current research and where dentistry, medicine and myofunctional therapy are now and should be in the future. At the end of our discussion I hope you will see that dentistry has always had an answer to these problems and if we are willing to think differently we can impact the health and well-being of this and future generations.

Dr. Palombaro graduated cum Laude from SUNY Buffalo School of Dental Medicine in 1983, was awarded membership into the OKU dental honor society and completed a GPR at Monmouth Medical Ctr. in Long Branch NJ in 1984. He has been in private practice for over 34 years in Binghamton, NY. Until recently he was on staff at two local hospitals, treated cases in the OR, and his continuing education experiences are highlighted by many hours learning implant dentistry, soft tissue grafting and more recently adult and pediatric sleep dentistry. He received his fellowship into the ICOI in 2007 and most recently participated in “Perfect Start” training, Myobrace training and pediatric airway education at the Raphael Center for Integrative Education in Clifton NJ. He has lectured on “Developing a Healthcare Based Practice Philosophy” at the 2001 Buffalo Niagara meeting and for many years after to the 3rd year class at UB dental. For over 10 years he provided a “Dentistry for Physicians” overview lecture for the 3rd year medical students from Upstate medical that were on rotation in Binghamton. He is a Member of the ADA, NYSDA, and member and past president of the Sixth District and Broome County Dental Societies.
Improving Endodontic Outcomes
(Part 2)

January 16, 2018 - 7:45 pm

Lecturer: Dr. Harry Singh

This interactive lecture will help clinicians increase their confidence in endodontic therapy. Additionally, it will focus on how to accurately diagnose and treat endodontic cases. Dr. Singh will provide tips to help avoid failures and how to overcome obstacles in treatment. After this course you will be able to properly identify the four main reasons endodontic cases fail in order to better improve your endodontic outcomes.

Dr. Singh is originally from Toronto, Ontario and now resides in Pittsford, NY with his wife and two sons. Dr. Singh is a graduate of Case Western Reserve University. He received his MS in Endodontics from Marquette University. Doctor Singh currently Practices in Rochester NY. Recently, he joined the faculty at University of Buffalo in the Department of Endodontics.
SCHEDULE AND LOCATION

This year’s meeting will once again be held at the University of Rochester’s Eastman Institute for Oral Health on 625 Elmwood Avenue.

The price of parking has been included in your registration fee. Please be sure to pick up your pre-paid parking ticket at the front desk when checking in.

Room assignments will be posted in the lobby of the University of Rochester’s Eastman Institute for Oral Health at the beginning of each session. Your pre-registration determines the most suitable room for each course, so please send in your forms on time.

All sessions will start at PROMPTLY at 6:30 p.m. and will be held regardless of weather or driving conditions. Sign-in will take place inside the individual lecture rooms.

SESSION I - Lectures
Tuesday, January 9, 2018

SESSION II - Lectures
Tuesday, January 16, 2018

SESSION III - HAPPY HOUR at Next Door Bar and Grill*
(Spouses and Significant others welcome!)

THURSDAY, January 25, 2018
6:30 - 9:30 pm
3220 Monroe Ave
Rochester, NY 14618

*Appetizers and Drinks will be provided

*Tickets to this event will be provided to members of the Seventh District Dental Society and Monroe County Dental Society at each lecture attended.

Refreshments will be served prior to lecture starting around 5:45pm and at the intermission of each session. Study Club sponsors will also be present, so please stop by and thank them for their contribution to the Club.

This program is approved by the Seventh District Dental Society (S.D.D.S.), an American Dental Association recognized provider.

Each class attended will receive one (1) credit hour of continuing education

GoldSecure™ Hybrid Overdenture using ATLANTIS™ Conus concept

The GoldSecure™ Hybrid Overdenture utilizes ATLANTIS™ Conus concept, and incorporates the proprietary ATLANTIS™ VAD (Virtual Abutment Design) for parallel milled abutments that correct divergent implant angles. The 5° SynCone® caps provide exceptional retention. The prosthesis is implant supported, and removable like an overdenture for optimal hygiene.

What makes it different?

- The non-resilient attachments provide a secure fit approaching that of a fixed appliance.
- The level of retention is unmatched by competing overdenture systems.
- The SynCone® caps are slightly malleable, allowing retention to improve over time. This eliminates the need for constant maintenance and replacement of attachments, unlike resilient systems.

Requirements

- 11 millimeters of space between the tissue surface (not implant surface) and opposing dentition.
- Not available on external hex implant systems.

Contact our GoldSecure™ implant team for your next fully edentulous case. We will guide you through planning, design and clinical stages to success! Ask for Tom or Holly.
Indication Specific Implants from Ø3.5 - 9.0 mm

**TILOBEMAXX™ Implants**

Immediate Full Arch Rehabilitation

- Allows for first molar occlusion
- Avoids posterior anatomical landmarks
- Reduces or eliminates cantilever

**Genesis Implants**

Immediate Placement

- Aggressive thread for primary stability
- Dual thread design ideal for extraction socket
- 17° & 30° angled multi-unit abutments

Complete Support from Molar-to-Molar
