Introduction to Pediatric Dentistry
For General Practitioners 2016

Seminar Objectives

The pediatric dental summer seminar series is designed to review various current topics related to the treatment and management of the pediatric patient. The topics covered span a variety of specialties and allow the general practitioner, dental hygienist, or dental assistant working with pediatric patients to acquire a better understanding of specific issues related to the pediatric population.

Moderator:  Doron Kochman DDS
Location:  Farash Auditorium
Tuition:  FREE
Time:  Friday mornings July/August 8:00 AM - 9:00 AM (Unless otherwise noted)

Lecture Objectives

Pediatric patients can present with some unique issues. By anticipating their occurrence, and knowing how to manage them when they are identified, clinicians can provide an important service for their patients.

7/8/16  Basic Behavior Management Techniques  Dr. Doron Kochman  8:00 -9:30 AM

Lecture Objectives

This course will review some basic techniques to manage pediatric patients. Upon completion of this course the clinician should be in a better position to deal with common behavioral issues.
Learning Objectives

1) Identify several space maintainers:
   a) Band and loop
   b) Lingual arch
   c) Transpalatal arch
   d) Nance appliance
   e) Removable appliances
   f) Partial braces

2) Analyze patient records for the appropriate use of the above space maintainers.

3) Analyze patient records to determine appropriate primary tooth extractions:
   a) primary second molars
   b) primary first molars
   c) over-retained / ankylosed primary teeth
   d) primary incisors

4) Identify anterior and posterior crossbites from patient photos.

5) Identify several types of crossbite correctors:
   a) Removable appliances with springs
   b) Quad helix
   c) Rapid palatal expander

6) Analyze patient records to determine when crossbite correction is needed and which appliance(s) may be used.

7) Understand the rationale for expansion of dental arches in the absence of a crossbite.

Lecture Objectives

1.) Pediatric operative dentistry techniques
2.) Commonly used pediatric operative dentistry materials
3.) Treatment planning options for the pediatric patient

In this lecture the pathogenesis of periodontal disease in children will be discussed along with the different etiological factors, possible risk factors and other conditions of the oral cavity presented in children. Some treatment options for these conditions will be suggested.
Lecture Objectives

1. Describe how eating disorders are diseases of disconnection and the impact of this on patient evaluation, management, and alliance with the dentist.
2. Identify signs/symptoms common to eating disorders presentation in the dentist's office.
3. Discuss at least two strategies to facilitate engagement of patients/families in treatment and their continued motivation for treatment.
4. Discuss at least two strategies promoting effective referral and collaboration with mental health professionals.

Lecture Objectives

8/12/16  Pediatric Otolaryngology      Dr. Margo Benoit      8:00- 9:00 AM

1. Identify symptoms of OSA in children compared to adults.
2. List three treatments for pediatric OSA.
3. Understand the sequelae of untreated OSA in children and adolescents.

Lecture Objectives:

8/19/16  Nasoalveolar Molding for Infants      Dr. Erin Shope      8:00 – 9:00 AM
born with Cleft Lip and Palate

1. Learn to identify patients who would benefit from nasoalveolar molding (NAM)
2. Learn the treatment goals and benefits of NAM
3. Gain a basic understanding of the treatment process of NAM

Lecture Objectives:

8/26/16  Behavior Management Techniques to deal with Autism, ADD, ADH      Dr. David Halpern      8:00 - 9:00 AM

Many children come to the medical profession (dentists, in this case) with behavioral issues; to be forewarned is to be prepared.

Different problems require different interactions from the medical professional.

The child will not change; we, as the adult, must control ourselves and the environment to successfully work with children with disabilities.

How we respond to a child’s behavior will determine the outcome.

Please Note These Different Lecture Times:

- July 1 – 8:00 AM – 9:30 AM
- July 8 – 8:00 AM – 9:30 AM
- Aug 5 – 8:00 AM – 9:15 AM
*Non-dental residents attending lectures please contact Doron Kochman DDS to make a reservation (limited seating) and to arrange CDE credits at info@PittsfordPediatricDentistry.com or 585-383-0640. Thank you!
