

Presents:

Dr. Thomas Dudney

"Be Aware of Wear: A Systematic Approach to Diagnosing, Treatment Planning, and Restoring the Worn Dentition"

And

"MACdentistry: The What, When, How, and Why of Current Indirect Restorative Materials, Adhesives, and Cements"

Annual Business Meeting & CE Event ~ Friday, November 7, 2025

Brook-Lea Country Club, 891 Pixley Rd, Rochester, NY 14624

Registration begins at 7:30 am | Meeting: 8:15 am | Lecture: 8:30 am-4:30 pm
7.0 CE credits

Biography

Thomas Dudney, DMD, is a 1977 graduate of the University of Alabama at the Birmingham School of Dentistry. He previously served as the clinical director for the Aesthetic Advantage hands-on programs taught by Dr. Larry Rosenthal at New York University and the Eastman Dental Clinic in London.

Currently, he is the clinical director of the Pacific Aesthetic Continuum (PAC) hands-on programs. In addition to teaching hands-on programs, he has presented workshops and lectures at dental meetings and has authored several articles on aesthetic and restorative dentistry.

He is a member of the American Dental Association, the Alabama Dental Association, and the American Academy of Cosmetic Dentistry. He is also a fellow of the American Society for Dental Aesthetics and a Diplomate of the American Board of Aesthetic Dentistry, as well as a member of Catapult Education's Speakers Bureau.

Course Description

Be Aware of Wear: A Systematic Approach to Diagnosing, Treatment Planning, and Restoring the Worn Dentition

In today's society, tooth wear is more prevalent than ever, and it is therefore incumbent upon the entire dental team to be well-versed in recognizing the clinical signs of wear while understanding the importance of prevention, when possible and restorative options, when necessary. This lecture will illustrate the different types of tooth wear, with clinical examples, and demonstrate a systematic approach to diagnosis and treatment.

Learning Objectives

- Understand office protocols to help patients prevent and/or treat acid erosion
- Recognize the clinical signs of intrinsic and extrinsic erosion
- Recognize the clinical signs of horizontal and vertical wear patterns
- Design an occlusal scheme that fits and identifies the grinding patterns of the patient
- Learn bite opening vs. crown lengthening vs. orthodontic intrusion to gain space for restorations

- Know the importance of an interdisciplinary team in treating wear cases
- Identify a systematic approach in the treatment of simple to complex wear cases

MACdentistry: The What, When, How, and Why of Current Indirect Restorative Materials, Adhesives, and Cements

As restorative materials, adhesives, and cements continue to evolve, change, and improve, it becomes more difficult for restorative dentists to keep up with the latest advances. With increasingly higher patient expectations for long-term clinical success, the dentist must have an understanding and working knowledge of these materials to make sound decisions. This lecture will discuss factors affecting the selection of indirect restorative materials that will satisfy the aesthetic and functional goals of the patient as conservatively as possible. Cases will be used to demonstrate the use of these materials, bonding agents, and cements in different clinical situations.

Learning Objectives:

- Learn factors affecting material selection and benefits of the new universal adhesives
- Understand monolithic vs. layered restorations
- Understand combining aesthetics and function with Emax lithium disilicate
- Identify the advantages and disadvantages of full contour zirconia
- Recognize which cements to use when and why
- Learn how to treat the tooth and the restoration when conventionally cementing or adhesively bonding
- Be aware of the long-term benefits of bioactive cements

Monroe County Dental Society is a component of the 7th District; recognized as a CERP provider through NYSDA. The Seventh District Dental Society is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at CCEPR.ADA.org.
