

Monroe County Dental Study Club (MCDSC)

Presents:

Dr. Gabriel Murphy

"Surgical Endodontics: Modern Procedures for Saving Natural Teeth"

Wednesday, September 30, 2026

Microsoft Teams 6:00 pm - 8:00 pm | 2 CE Credits

Log-in begins at 5:45 pm. You must be on for the entire meeting to receive CE credits.

Dr. Gabriel Murphy was born and raised in Chile, where he earned his Doctor of Dental Surgery (DDS) degree from the Universidad de Antofagasta. After several years in private clinical practice, he moved to the United States to complete a two-year Advanced Education in General Dentistry (AEGD) residency and a one-year General Practice Residency (GPR) at the Eastman Institute for Oral Health, University of Rochester. During this time, he also earned a Master of Science degree from the Warner School of Education at the University of Rochester.

Dr. Murphy then practiced in upstate New York for four years before relocating to San Francisco to pursue specialty training in endodontics. He completed his Endodontics residency at the University of the Pacific, Arthur A. Dugoni School of Dentistry, where he also earned a Master of Science in dentistry.

Dr. Murphy returned to Rochester, with his family, to work at Roc Pointe Endodontics. He looks forward to continuing his professional career here and serving the local community.

Course Description

The preservation of natural dentition remains one of the primary goals of contemporary dentistry. While conventional root canal treatment successfully manages most endodontic conditions, advances in surgical endodontics have expanded the range of treatment options available for teeth with complex pathosis, persistent disease, or challenging clinical presentations. Today, endodontists can utilize a variety of surgical approaches to preserve teeth that may otherwise be considered to have a questionable prognosis.

This lecture will provide an evidence-based review of contemporary surgical endodontics and the expanding role of surgery in tooth preservation. Through the presentation of clinical cases, participants will explore the diagnostic process, case selection, treatment planning, surgical management, and long-term outcomes of teeth treated with surgical endodontic procedures. Emphasis will be placed on recognizing situations in which surgical intervention may be indicated, understanding the factors that influence treatment success, and appreciating the diverse surgical options available to help maintain the natural dentition.

Learning Objectives

- Review current concepts and advances in surgical endodontics.
- Recognize clinical situations in which conventional endodontic treatment may not be sufficient.
- Identify appropriate indications for surgical endodontic intervention.
- Understand the principles of diagnosis, treatment planning, and surgical management of complex endodontic cases.
- Evaluate factors that influence healing and long-term treatment outcomes.
- Apply evidence-based decision-making to the management of surgically treated teeth and the preservation of natural dentition.

Monroe County Dental Society is a component of the 7th District, recognized as a CERP provider through NYSDA. Continuing Education (CE) credits are awarded for all lectures that meet the NYSED requirements. One hour of credit is awarded for every 50 minutes of presentation attended. To verify attendance, Teams records the registrant's login.

*The Seventh District Dental is an ADA CERP Recognized Provider approved by the New York State Dental Association. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. The Seventh District Dental Society designates this activity for **2** continuing education credits.*
